

FABTECH Demonstration--Clearing an emergency stop condition on TPL200FX from the operation control stand

Operator: Mira Tech Support

Started: Fri, Sep 10, 2021 10:17 AM PDT

Completed: Fri, Sep 10, 2021 10:18 AM PDT

Time Elapsed: 53s

Resolution: COMPLIANT

1. Locate emergency stop button

11s

Locate the position of the emergency stop button on the two-button operation control stand.

2. Release the lock of the emergency stop button

8s

To unlock the emergency stop button from its locked position, turn the button clockwise, or in the direction of the arrows shown on top of the button. The button will release then raise.

3. Reset button

10s

Locate the blue Reset button on the two-button operation control stand and press it.

4. Confirmation of the press position

4s

Confirm location of the press:

Top--
PRESS
MUST BE
AT TOP
TO
PERFORM
A SINGLE
OR
CONTINUOUS
CYCLE

At the
bottom, or
between
bottom and
top

5. Returning to single or continuous mode

17s

Turn the mode key to SINGLE or CONT. (continuous) mode to start using the press. Press both RUN buttons to start a cycle.
